

Asphalt Paver Machine(LT series)

Introduction and Features:

1. Asphalt paver machine belongs to road surfacing machinery. It is widely used in construction industry both China and abroad.
2. Asphalt paver machine is used to resurface the roadbed with asphalt. While using the asphalt paver machine, make sure the asphalt flow out of the machine continuously. Temperature of the paver machine should be controlled strictly to ensure the paving effect.
3. LT series asphalt paver machine is designed with reasonable and fashionable pattern, it runs with perfect performance. Operation of the asphalt paver machine is convenient. Different types of asphalt paver machines are available.
5. We are professional construction machinery manufacturer located in Shanghai, China.

Specifications of asphalt paver machine:

Model	2LTLZ45B	
Basic Paving Width	2500mm	
Max. Paving Width	4500mm	
Paving Thickness	10 ~ 250mm	Max. 250mm (Paving width 2500mm)
		Max. 150mm (Paving width 4500mm)
Paving Speed	3.01 ~ 8.97 (m/min)	
Driving Speed	2.29 ~ 16.74 (km/h)	
Hopper Capacity	10 T	
Max. Theoretical Productivity	220 t/h	
Climbing Capacity	Working Climbing \geq 10%	
	No-load Climbing \geq 15%	
Vibrator Frequency	50 Hz	
Max. Paving Crown	4 %	
Engine Model	F4L912	

Rated Power	46 Kw
Rated Rotate Speed	2000 r/min
Plate Feeder Speed	11.6~34.5 (m/min)
Auger Rotate Speed	49~146 (r/min)
Heating Method	Fuel Heating
Weight	11 T
Oversize(L×W×H)	5550×2494×2450 mm
