

LTL70 Asphalt Paver Machine

Introduction and Features:

1. Asphalt paver machine belongs to road surfacing machinery. It is widely used in construction industry both China and abroad.
2. Asphalt paver machine is used to resurface the roadbed with asphalt. While using the asphalt paver machine, make sure the asphalt flow out of the machine continuously. Temperature of the paver machine should be controlled strictly to ensure the paving effect.
3. LTL70 asphalt paver machine is designed with reasonable and fashionable pattern with high rated power. Its paving width is much longer. This machine runs with perfect performance. Operation of the asphalt paver machine is convenient. Different types of asphalt paver machines are available.
5. We are professional construction machinery manufacturer located in Shanghai, China.

Specifications of asphalt paver machine:

Model	LTL70
Basic Paving Width	3000mm
Max. Paving Width	7000mm
Paving Thickness	20~300mm
Paving Speed	2.00~3.60 (m/min)
Driving Speed	0.90~2.86 (km/h)
Hopper Capacity	12 T
Max. Theoretical Productivity	400 t/h
Climbing Capacity	Working Climbing \geq 10%
	No-load Climbing \geq 15%
Vibrator Frequency	0~50 Hz
Max. Paving Crown	4 %
Engine Model	F6L913T

Rated Power	86 Kw
Rated Rotate Speed	2300 r/min
Plate Feeder Speed	19.6~33.2 (m/min)
Auger Screw Rotate Speed	71~120 (r/min)
Heating Method	Fuel Heating
Weight	17.4 T
Oversize(L×W×H)	6565×3210×3050 mm
