

LXH1000 Road Milling Machine(Reclaim Asphalt)

Introduction and Features:

1. Road milling machine belongs to road surfacing machinery, our road milling machine can reclaim asphalt. It is widely used in construction industry both China and abroad.
2. Our road milling machine for reclaiming asphalt can be operated conveniently. It uses famous Rexroth hydraulic pump and speed reducer imported from Germany.
3. LXH1000 road milling machine runs with high performance. This kind of road milling machine is produced with fashionable design, easy operating system and superb quality to meet various requirement of customers. This kind of machine is favored with environmental protection property.
4. We are professional construction machinery manufacturer, located in Shanghai, China.

Specifications of road milling machine:

Model	LXH1000
Milling Width	1000mm
Milling Depth	0~150mm
Milling Speed	0~14m/min
Traveling Speed	0~12km/h
Width of conveying belt	400mm
Max. Discharge height	3100mm
Climbing Capacity	≥15%
Min. Turning Diameter	13.5m
	18m (With Reclaim Device)
Min. Distance from ground	80mm
Engine Model	D6114ZG1B
Engine Method	6 cylinders, water-cooled, pressurization diesel
Weight	15800kg

Rated Power	140Kw
Rated Rotate Speed	2300 r/min
Fuel consumption rate	228 g/KW*h
Oversize(L*W*H)	10400*2430*3350 mm
