

LXZY1000C Road Milling Machine(Reclaim Asphalt)

Introduction and Features:

1. Road milling machine belongs to road surfacing machinery, our road milling machine can reclaim asphalt. It is widely used in construction industry both China and abroad.
2. Our road milling machine for reclaiming asphalt can be operated conveniently. It uses famous Rexroth hydraulic pump and speed reducer imported from Germany.
3. LXZY1000C road milling machine runs with high performance. This kind of road milling machine is produced with fashionable design, easy operating system and superb quality to meet various requirement of customers. This kind of machine is favored with environmental protection property.
4. We are professional construction machinery manufacturer, located in Shanghai, China.

Specifications of road milling machine:

Model	LXZY1000C
Milling Width	1000mm
Milling Depth	0~100mm
Milling Speed	0~13m/min
Traveling Speed	0~11 km/h
Climbing Capacity	≥15%
Min. Turning Diameter	11m
Min. Distance from ground	80mm
Water Tank Volume	150 L
Electric System Voltage	12 V
Engine Model	F6L913T
Engine Method	6 Cylinders, Air-cooled diesel
Weight	12500kg
Rated Power	86Kw

Rated Rotate Speed	2300 r/min
Fuel consumption rate	228 g/KW*h
Oversize (LxWxH)	4000x2170x2740 mm
