

ZJY5101TYH Road Milling Machine(Reclaim Asphalt)

Introduction and Features:

1. Road milling machine belongs to road surfacing machinery, our road milling machine can reclaim asphalt. It is widely used in construction industry both China and abroad.
2. Our road milling machine for reclaiming asphalt can be operated conveniently. It uses famous Rexroth hydraulic pump and speed reducer imported from Germany.
3. ZJY5101TYH road milling machine runs with high performance. This kind of road milling machine is produced with fashionable design, easy operating system and superb quality to meet various requirement of customers. This kind of machine is favored with environmental protection property.
4. We are professional construction machinery manufacturer, located in Shanghai, China.

Specifications of road milling machine:

Model	ZJY5101TYH
Max. Running Speed	80 km/h
Min. Turning Diameter	16m
Brake Distance	9m
Min. Distance from ground	230mm
Hopper Volume	1.8 m ³
Hopper Capacity	3000 kg
Hopper Heat Preservation capacity	Temperature drop≤10 (°C/h)
Asphalt Tank Capacity	100L
Crucial instrument	Hydraulic impacted pickaxe
Roller Length	1625 mm
Rolling Speed	0~3 km/h

Roller Pressure	40KN/m
Road Roller Sedimentation Rate	≤4cm/24h
Roller Climbing Capacity	10 %
Chassis Model	EQ3092F19DJ
Engine Model	YC4E140-20
Rated Power	105Kw
Rated Rotate Speed	2800 r/min
Weight	6900 kg
Oversize (LxWxH)	7010x2450x2740 mm
